

SuperSeton

Smooth, simple, secure.

Currently, setons have knots that create pain, irritation and discomfort for your patients. Not only does this often limit patients' mobility in work, sports, going out and lovemaking, but it can create further complications, leading to increased hospital visits and higher costs.

Superseton is a smooth, simple and secure solution that prevents unnecessary irritation and discomfort for your patients. In fact, it's significantly increasing patients' mobility and quality of life.

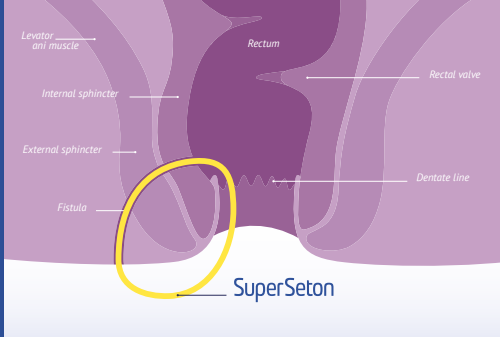

Increasing
mobility and
quality of life for
your patients

Isn't it time for a better way of dealing with fistulas? Isn't it time for innovation?

Today, we have a choice.

Because setons just got *super*.

Knotless and smooth, SuperSeton features an innovative closure that is secure and flexible, and can be applied manually within seconds with the patented disposable applicator. While the clever design offers numerous benefits, it still fits seamlessly with established practice.

SuperSeton makes treating patients quicker, easier and more efficient.

Quicker
Easier
More efficient
